...WINTER STORM WARNING REMAINS IN EFFECT UNTIL 6 AM CST
TUESDAY...

* WHAT...Heavy snow possible. Total snow accumulations 3 to 6
  inches for most locations. Locally higher amounts up to 8
  inches possible for some spots south of Interstate 40 and
  across the Plateau. The far northwest counties of Middle
  Tennessee are expected to have the lowest amounts.

* WHERE...All of Middle Tennessee.

* WHEN...Until 6 AM CST Tuesday.

* IMPACTS...Travel could be very difficult. The hazardous
  conditions could impact the morning or evening commute.
  The cold wind chills as low around 5 below zero could
  result in hypothermia if precautions are not taken.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

If you must travel, keep an extra flashlight, food, and water in
your vehicle in case of an emergency.

The latest road conditions for the state you are calling from can
be obtained by calling 5 1 1.

Data sources

Station readings: NOAA NCEI Global Historical Climatology Network – hourly (GHCNh), for the nearest reporting station. Units converted from metric for display.

Warnings: NWS VTEC events and the verbatim text of NWS bulletins, retrieved from the Iowa Environmental Mesonet archive of NWS products (Iowa State University).

Location: US Census Bureau Geocoder; timezone from coordinates (IANA tz database).

What this report leaves out

This report holds only the records that answer its question. It doesn't include every record for the date, such as raw station reports, all warning bulletins or the wider storm record. Our standard Property damage report at weatherevidence.com has them.

Distances and bearings

Distances are great-circle miles from the site's coordinates; bearings are the direction from the site to the record (e.g. '4.6 mi WSW' means the record lies west-southwest of the site). A record's own position may be approximate: storm reports are often given to the nearest town or road.

What this report establishes

This report compiles public US government weather records for the selected location and date. Records near the site do not by themselves establish conditions at the exact location. Missing values are not zero, and 'not published yet' is different from 'no record'. It does not determine property damage, causation, insurance coverage or legal admissibility, and it is not a certified government record or expert opinion.

Retrieval and report identity

Data retrieved: Nov 6, 2026, 7:30 AM CST. Report ID: WE-2024-01-15-AF41C378EC3B. Every source response used is stored unmodified; the hashes below identify those exact bytes, and the report ID is derived from them and their retrieval times, so this report can be regenerated byte-for-byte and verified.
